Combine this product with **AquaLife Barley Straw Extract 2-in-1**, to fight the stringy stuff, and you will have the ultimate sludge remover and water quality team for your koi or garden pond.

**AquaLife Water Garden Cleaner ASF** supplies 5 strains of water cleaning and sludge removing bacteria, in a value-priced formulation designed for year round use. Our proprietary fermentation process reduces smell and prevents the need to purchase a different product at every change of season. No longer do you need to wait for water to warm up in the spring, or to buy something every season to keep your pond looking pristine year round.

**AquaLife Water Garden Cleaner ASF** reduces maintenance while safely and naturally keeping your pond beautiful. Completely safe for all fish, plants, wildlife, pets, and people.

**AquaLife Water Garden Cleaner ASF** is a natural products designed to get your pond in shape over time and to maintain its beauty when used according to directions.

**Dosage:** Apply 4 fluid ounces per 1000 gallons of water. Apply every 1-2 weeks, or as needed. Maintain proper aeration.

**Product: WATER GARDEN CLEANER ASF**

**Category:** Additives and Supplements, Pond

**Unique Product Features:** Supplies 5 strains of beneficial bacteria to reduce the need for pond maintenance and water changes by biologically cleaning the gravel and clearing water. All-season formulation keeps on working week after week, month after month.

**Packaging:** 32 fluid ounce and 1 gallon plastic bottles

### Product Rationale

Combining different strains of synergistic bacteria (approximately 750 million colony forming units per milliliter) achieves a formulation that can be used to keep ponds clean and clear during the entire year. Other products can only be used when the pond warms up in spring, for example. **AquaLife WATER GARDEN CLEANER ASF** reduces the need for water changes and laborious maintenance tasks, like sludge removal, by supplying carefully selected bacterial strains.
